

## Dear Parents!

Language development begins already before birth. Body language – tone – speech melody – parents convey feelings and moods, which the child understands long before it can speak. Therefore it is important that children speak in their first language, that they further develop and evolve their first language. Whether a child can acquire a second language correctly is dependant on the development of their first language. The promotion and nurturing of the first language positively influences the acquisition of the second language!

In kindergarten, your child learns many things in addition to the German language, which are important for development. In order to be able to purposefully promote your child and to facilitate their acquisition of German as the second language, there is the free offer of a language skills assessment in the first language in cooperation with a language advisor as well as with an interpreter.

The interpreter plays with your child and in doing so observes how the child speaks in the first language.

Subsequently, we would like to invite you to a parent discussion, at which the interpreter will also be present.

All information concerning your child and the content of our discussion remain in the kindergarten and will not be given to other persons.

## The appointment for the language skills assessment is on:

We look forward to seeing you!

Yours sincerely,
